

Intersection Improvement

COUNTY 389 AND STATE 77 INTERSECTION

SOLUTION

This project will consist of the addition of a left-turn lane for westbound traffic on County 389 turning onto State 77. This project will enhance daily traffic by decreasing congestion and improving the flow of vehicles through the intersection.

PROBLEM

At this heavily traveled intersection, vehicles heading west through the intersection are forced to wait for left-turning motorists to move before they can proceed through the intersection.
