

Intersection Improvement

SHERMAN AVE & 15TH ST (US 98) INTERSECTION

SOLUTION

This project will include the construction of left-turn lanes for Sherman Avenue at its intersection with 15th Street (U.S. 98). The project will enhance daily traffic by decreasing congestion and improving the flow of vehicles through the intersection.

PROBLEM

This intersection endures significant traffic volumes, forcing vehicles to wait for left-turning vehicles before they can proceed through the intersection.
