

Roadway Safety

15TH STREET MULTI-USE PATH

SOLUTION

The installation of a multi-use path will greatly enhance access to the beach and will include a multi-use bridge over an existing storm water ditch.

Currently, there is no other access over the ditch other than the street itself.

Pedestrian safety will be enhanced by providing a safe alternative from walking in the street or on the street shoulder.

PROBLEM

The 15th St corridor funnels significant traffic from Hwy 386 to Hwy 98. Many pedestrians utilize 15th St as their path to the beach.
