

Intersection Improvement

COUNTY 389 AT US 231 INTERSECTION

SOLUTION

This project will consist of the addition of a dedicated right-turn lane for south-bound traffic at the intersection of County 389 (East Avenue) and U.S. 231. This project will enhance daily traffic by reducing both stops and delays for all approaches at the intersection.

PROBLEM

Motorists on U.S. 231 experience significant delays because of the time that is needed for the traffic signal to serve County 389.
