

Resurfacing

CITY-WIDE REPAVING

SOLUTION

A proper surface will enhance not just the aesthetic appeal of the street, but will also increase safety for the citizens and visitors. Wear and tear on vehicles will be decreased.

PROBLEM

There is an extensive list of roads in Callaway that are in need of resurfacing. These roads contain pot-holes, cracking, and depressions that can create driving hazards and damage vehicles. Historically, Callaway has managed to budget approximately \$100,000 annually for paving. Additional funding is needed to keep up with the annual paving needs of the City and to fix the backlog of deteriorated roads.
