

Roadway Safety

STATE AVENUE SIDEWALK

SOLUTION

This project consists of construction of a sidewalk or multi-use path along the west side of State Ave, including a pedestrian bridge over the drainage ditch near Walmart.

This project will improve pedestrian access from 19th St to 23rd St including to businesses along both streets and to the Bay County Conservancy property with a boardwalk nature trail.

PROBLEM

This heavily traveled corridor is significantly deteriorated and is in need of sidewalks.

Pedestrian use is demonstrated by a well-worn footpath along this stretch of roadway.
