

Roadway Safety

HUTCHINSON BEACH ELEMENTARY SCHOOL SIDEWALK

SOLUTION

This project will construct 3,041 linear feet of 6 foot wide concrete sidewalks along Clara Av, Beth St, and Agave St.

Construction of a complete pedestrian network around the school will provide connection to people in the Bahama Beach Subdivision, thus minimizing the use of automobiles.

PROBLEM

This heavily traveled corridor lacks sufficient safe walking and biking paths for people living in the area and students traveling to and from Hutchinson Beach Elementary School.
