

Resurfacing

CITY-WIDE RESURFACING

SOLUTION

Ten City-wide resurfacing projects over the next 10 years are:

1) Shade St, Grimes St, portions of Hickory St; 2) Maine St, Horne Ave, Parker St, Live Oak St; 3) Cedar St, Pitts Ave, Parker Village Circle, Hwy 22-A; 4) Germaine St, Winifred Ln, Pratt Ave, portion of West St; 5) Marigold St, 5th St, High St, portions of 4th St and 2nd St; 6) Luther St, Collins Dr, Thornton Ln, Soule Dr, portion of Arrow St; 7) Sunset Dr, Dover Rd, Alma Ave; 8) Boatrace Rd, Lance St, Phillips Ct; 9) Portion of Hickory St; 10) Stratford Ave

PROBLEM

Parker has approximately 26 miles of neighborhood streets which need to be resurfaced at least every 20 years, or about 5% annually.

The streets are deteriorated, present safety hazards, and drainage from some of the streets is inadequate. The deteriorated streets present a bad appearance for potential residents and businesses.
