

Roadway Safety

PEDESTRIAN-SAFE SIDEWALKS

SOLUTION

This project consists of putting in pedestrian-safe sidewalks along Business Highway 98 from Cedar St to Tyndall Parkway, and north from Business Highway 98 along Highway 22-A to Parker Elementary.

Sidewalks would also be added from Business Highway 98 north on West St to connect with the sidewalks on Lake Dr. Lake Dr sidewalks would be extended to Tyndall Pkwy.

PROBLEM

Business Highway 98 is a highly traveled collection corridor for adjacent residential neighborhoods and is used by students to walk to Parker Elementary School. There is no continuous, safe, pedestrian travel-path along the corridor and to the school (via Highway 22-A) and adjacent parks.

Adults and children travel to the school, the Parker Sports Complex, the PEEP Park at Lake Martin, to stores, and to their neighborhoods. Connecting businesses on Tyndall Pkwy from close-by neighborhoods with pedestrian-safe sidewalks along Lake and Boatrice is critical.
